

NEW GENERATION MOTORS CORPORATION

Bridgestone Ecopia Solar Race Tire

Specifications of the tire (Size 2.25" X 14") are as under:

- Nominal Diameter – 19.09 inches
- Wheel Diameter – 14 inches
- Section Width – 2.48 inches
- Weight – 1.61 Lbs
- Inflation Pressure – 113 psi
- Static Load Capacity – 440 Lbs (200 Kg)
- Rolling Resistance – 0.0045 – 0.005 (Measured at 100 KPH at 6 Kg/cm²)

Note: Users of this tire should be aware that it is designed as a special purpose tire for use on experimental electric vehicles. It is clearly market “Not for Highway Service” as it does not comply with those requirements normally associated with conventional public highway use products. It may, however, be used under controlled conditions on public highways, subject to the sanctions of local traffic authorities.
